### #6050 RECHARGEABLE LASERPRO™ SYSTEM

The LaserPro™ is an industrial/professional quality multi-use spotlight. It is made of unbreakable ABS body with polycarbonate lens and thermoplastic rubber shroud. Features include a dual filament Xenon back-up safety lamp, operating during 30 hours each filament (60 hours in total). It includes a multi-position, ergonomically designed handle (that fits gloved hands), adjustable position foldaway stand and double switch. The Rechargeable LaserPro™ System is equipped with the battery pack pre-installed ready for charging. The system includes: Rechargeable LaserPro™, handy desk/dash wall mount Smart charger base, 220V transformer, hi-capacity rechargeable battery pack and #6054 Xenon high performance lamp. The Rechargeable LaserPro™ System is submersible to 150 m and not approved for hazardous location use. Unconditionally Guaranteed... forever.
